ELECTRONIC

**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

Notice of the Office communication was sent electronically on above-indicated "Notification Date" to the following e-mail address(es):

us-docketing@qualcomm.com  
kascanla@qualcomm.com  
nanm@qualcomm.com

<b>Office Action Summary</b>	<b>Application No.</b> 09/823,015	<b>Applicant(s)</b> SARKAR ET AL.	
	<b>Examiner</b> ANH-VU H. LY	<b>Art Unit</b> 2616	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 22 April 2008.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-13 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 1-5 is/are allowed.
- 6) ☒ Claim(s) 6-13 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \*    c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**DETAILED ACTION**

***Response to Amendment***

1. This communication is in response to Applicant's amendment filed April 22, 2008.

Claims 1-13 are pending.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 6-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Razoumov et al (US Patent No. 6,771,700 B1).

With respect to claim 6, Razoumov discloses that in a wireless communication system (Fig. 1), a method comprising:

determining a first transmission energy setpoint to achieve a first transmission frame error rate in a first transmission (col. 4, lines 31-32, a transmitting station transmits information, contained in frames, with a first energy (E1). Herein, E1 will certainly yield a first transmission frame error rate);

adjusting the transmission energy setpoint on occurrence of a first transmission error (col. 4, lines 36-37, the transmitting station selects a second transmission energy (E2). Herein, E2 is the adjusted first transmission energy setpoint), wherein the first transmission error is received

Art Unit: 2616

from a receiver (col. 4, lines 34-35, the receiving station reports the first FER1 and identity of those frames received in error back to the transmitting station);

determining a retransmission energy setpoint to achieve a retransmission frame error rate (col. 4, lines 36-37, the transmitting station selects a second transmission energy (E2). Herein, E2 will certainly yield a retransmission frame error rate); and

adjusting the retransmission energy setpoint on occurrence of a retransmission error (col. 7, line 22, adjusted retransmission energy setpoint E3), wherein the retransmission error is received from the receiver (col. 4, lines 34-35, the receiving station reports the first FER1 and identity of those frames received in error back to the transmitting station).

With respect to claim 7, Razoumov discloses adjusting the retransmission energy setpoint as a function of transmission energy setpoint (col. 7, formula 22, energy setpoint E2 is adjusted based on E1 and its frame error rate).

With respect to claim 8, Razoumov discloses adjusting the retransmission energy setpoint to achieve a desired frame error rate for retransmission (col. 4, formula 2 and col. 7, formula 22 and 23).

With respect to claim 9, Razoumov discloses adjusting the first transmission energy setpoint to achieve a desired frame error rate for transmission (col. 6, formula 21).

With respect to claim 10, Razoumov discloses that wherein the first transmission frame error rate is greater than the retransmission frame error rate (col. 6, formula 21, herein, according to the formula,  $f(E1)$  is always greater than  $f(E2)$  for any applied numbers).

With respect to claim 11, Razoumov discloses that first wherein the transmission frame error rate and the retransmission frame error rate result in a desired total frame error rate (col. 4, formula 2).

With respect to claim 12, Razoumov discloses that wherein the first transmission frame error rate and retransmission frame error rate are predetermined values (col. 5, lines 5-7, any method of solving the equation 1 subject to a constraint requires the knowledge of a FER as a function of energy. Herein, requiring the knowledge of FER is an indication of a predetermined FER).

With respect to claim 13, Razoumov discloses that wherein the first transmission frame error rate and retransmission frame error rate are dynamic values (col. 4, formula 2. These values are dynamically changed as a function of transmit energies).

***Allowable Subject Matter***

3. Claims 1-5 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art does not teach or fairly suggest determining a first transmission energy setpoint as a

Art Unit: 2616

function of the first transmission frame error rate and a first transmission quality, wherein the determination of the first transmission energy setpoint is responsive to an update trigger; and determining a retransmission energy setpoint as a function of the retransmission frame error rate and a retransmission quality, wherein the determination of the retransmission energy setpoint is responsive to the update trigger, as specified in independent claim 1.

### ***Response to Arguments***

4. Applicant's arguments with respect to claims 1-13 have been considered but are moot in view of the new ground(s) of rejection. After carefully reviewing Razoumov '700 reference, Examiner believes that Razoumov teaches the claimed invention as currently recited in claims 6-13.

### ***Conclusion***

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to ANH-VU H. LY whose telephone number is (571)272-3175. The examiner can normally be reached on Monday-Friday 7:00am - 4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chi Pham can be reached on 571-272-3179. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
